

**Classwork:** Vocabulary checklist (should all be in your notebook)

*What do they mean and what is the standard notation?*

**Notation**

1. How do we describe 'undefined terms'?

- ☐ Point
- ☐ Line
- ☐ Plane

2. What are the basic geometry terms involving points, lines, and line segments?

- ☐ Collinear set of points
- ☐ Non-collinear
- ☐ Coplanar
- ☐ Line segment
- ☐ Distance between two points (on the real number line)
- ☐ Length/measure of a line segment
- ☐ Congruent segments

3. What are the basic geometry terms involving rays and angles?

- ☐ Rays
- ☐ Opposite rays
- ☐ Angle
- ☐ Straight angle
- ☐ Right angle
- ☐ Obtuse angle
- ☐ Acute angle
- ☐ Interior/exterior of an angle
